

2018 Special Status Species Workshops:

California Red-Legged Frog, Alameda Whipsnake & California Tiger Salamander

The Alameda County Conservation Partnership is excited to offer three special status species workshops in the spring of 2018, each with both field and classroom components, lead by subject matter experts.

Workshop 1: California Red-Legged Frog

Trish and Greg Tatarian, Wildlife Research Associates

April 18-19 | Livermore, CA

REGISTER NOW!

Offered by the Partnership for the 14th consecutive year, this highly sought-after workshop is comprised of a daytime classroom and field session, and two small group night field sessions. This workshop is a great opportunity to receive training in field sampling techniques, species identification, and habitat requirements of this species. [Learn more.](#)

Workshop 2: Alameda Whipsnake (Alameda Striped Racer)

Karen Swaim, Swaim Biological

May 9-10 | San Ramon, CA

SAVE THE DATE! Don't miss your chance to attend the first Alameda whipsnake (striped racer) workshop offered by the Conservation Partnership in four years! Comprised of one daytime classroom session and two small group field sessions, attendees will hear about the most recent genetic work regarding this species, receive trapping and sampling training, and learn about habitat requirements.

Workshop 3: California Tiger Salamander

Dr. Pete Trenham, Penn State University and Dr. Chris Searcy, University of Miami

May 16-17 | Livermore, CA

SAVE THE DATE! The Conservation Partnership is excited to welcome back Drs. Trenham and Searcy for the 2018 California Tiger Salamander workshop. Learn about the geographic distribution, hybrid populations, upland and aquatic habitat management, population ecology, survey methods, in-field identification, sampling and habitat ID.
